

**May 6 to 10, 2020**

## Integrative Brainspotting

### ADVANCED LEARNING EXPERIENCE

The BSP intensive workshop was designed by David Grand as a way to provide the therapist an immersion in advanced BSP techniques, having the possibility to experience how BSP is applied integratively in the office, while the group experiences a process of healing.

**14 participants**  
**14 tutorized therapy sessions**

- Registration is limited to 14 participants, so 14 therapy sessions are offered, one per participant, each one can be a therapist and a client once.
- Mario Salvador sits next to the student who acts as a therapist and teaches guiding the therapist in the process of inquiry, attunement and framing. Each session is analyzed extensively to emphasize the learning process.

## Personal skills

The Intensive is a Master Class to develop the skills as an advanced Brainspotting therapist with personalized advice.
