

MASTER CLASS BRAINSPOTTING with DAVID GRAND

From the Neuroexperiential Model

December 6 to 8, Online (Zoom)

- This Master Class starts with a lecture and discusses of the NEM (Neuroexperiential Model) which is interwoven into the three day training.
- Six Experiential Sessions (two per day). Three Role Play Supervision Sessions (one per day).
- There is extensive debrief after each Experiential and Role Plays.
- The Experiential is a session with a volunteer where David Grand shows how he uses Brainspotting with clients in his office (without needing to demonstrate any specific techniques). The Experiential sessions are spontaneous, innovative and integrative and demonstrate receiving and holding the frame in the context of Uncertainty. They also demonstrate the NEM which is woven throughout the Master Class.
- In the Role Play Supervision a volunteer presents a challenging Brainspotting case to David and they reverse roles and the client enrolls as the client and David enrolls as the therapist. The ensuing process exemplifies how David works with challenging clients and situations using attunement, presence, framing and eye positions to illustrate healing possibilities of the NEM.
- **The minimum requirement to participate is to have completed Phase I.**

Given by David Grand, Ph.D., Discoverer of Brainspotting
www.brainspotting.com.

**Exceptional opportunity to learn and work directly
with David Grand**

Prize: 590 € before 30/10. Since 01/11, 640€.
